Education

DIT University, Dehradun

Aug. 2021 – May 2025

Bachelor of Technology in Computer Science Engineering

Dehradun, India

Relevant Coursework

- Data Structures & Algorithms
- Machine Learning
- Database Management Systems
- Natural Language Processing
- Artificial Intelligence
- Computer Networks

Experience

Radials International Mining Services Pvt. Ltd.

Jul 2025 – Present

AI Agent & Application Developer

Dehradun, India

- Architected a stateful, multi-step agentic pipeline using Model Context Protocol (MCP) — LangGraph-style orchestration — to autonomously audit data across Google Sheets, Google Drive, and SQL databases with zero human intervention.
- Engineered a real-time monitoring engine validating data integrity across 15+ operational modules (Sensors, Attendance, Equipment Health); automated PDF email reporting to stakeholders — 95% reduction in manual auditing time.
- Built a production async FastAPI + PostgreSQL + pgvector Ledger Automation System; hybrid RAG engine (vector similarity + accounting rules) surfaces top-4 Dr/Cr ledger suggestions with confidence scores — 85% reduction in manual entry time.
- Implemented human-in-the-loop review workflow writing approved feedback to both relational and vector stores for continuous model improvement; streaming-safe, concurrent-safe API serving.

Cynoteck Technology Solutions

Mar 2025 – Jun 2025

AI/ML Engineer Intern

Dehradun, India

- Built NLP pipelines for text classification and sentiment analysis using Python, Scikit-learn, and NLTK; handled preprocessing, feature engineering, model training, and evaluation.
- Conducted ML experimentation across multiple algorithms; documented performance metrics and delivered insights on model selection and validation workflows.

Projects

AI Chatbot for Email Analysis | Python, FastAPI, Gmail OAuth, OCR, LLM Agent Architecture, Excel Automation

2025

- Designed a planner-executor agentic architecture converting natural language into multi-step action plans — attachment retrieval, OCR extraction, classification, and automated Excel log generation.
- Modular FastAPI backend with plug-in framework enabling extensibility without model retraining; eval hooks tracking extraction quality per action step.

AI Expense Processing Pipeline (WhatsApp) | Python, OCR, VLM, FastAPI, PostgreSQL, Async Queue

2025

- End-to-end async pipeline ingesting noisy WhatsApp data (chat, screenshots, receipts); OCR + Vision-Language Model verified and corrected transaction amounts with confidence-based validation.
- Queue-backed async processing with post-processing heuristics; delivered structured expense outputs for real-time chat workflows and admin CSV reporting.

Technical Skills

Languages & Frameworks: Python (async, typed), SQL, FastAPI, Streamlit

Agentic & Vector: MCP, LangGraph-style stateful pipelines, LangChain-compatible patterns, RAG, pgvector, Vector Databases, Human-in-the-loop, Guardrails

AI / ML: Machine Learning, NLP, OCR Pipelines, VLM, LLM API Integration (Claude, OpenAI, Gemini), Text Classification, Sentiment Analysis

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, NLTK, Openpyxl, Pypdf

Tools / Platforms: Docker, GitHub, JupyterLab, PostgreSQL, Google Sheets API, Google Drive API, AWS EC2, SMTP

Certifications

Introduction to Big Data • Machine Learning with Python • Python for Data Science • AI & Development
Deep Learning & Neural Networks with Keras • AI for Everyone
